Reporting No: 04 Week No: 04 Date From: 02-06-2026 Date To: 11-06-2026

Student ID: 24DCE106

Internship Title: Disease Prediction using Django and Machine Learning

WEEKLY REPORT-4

Completed Tasks:

- Implemented patient and doctor consultation history views, listing past consultations with status (active/closed).
- Completed the rating and review system: patients can rate a doctor after consultation, with the average rating computed and updated on the doctor's profile.
- Finalized the chat interface for live messaging between patient and doctor during an active consultation.
- Carried out end-to-end manual testing of the complete workflow: signup, login, symptom checking, prediction, doctor consultation, chat, rating, and feedback submission.
- Fixed bugs related to session handling, redirect flows, and form validation across the accounts and main_app views.
- Prepared project documentation, screenshots, and the final README, and reviewed the codebase for cleanup before submission.
